The goal of our work is interpretation of questions of
the excitation of helium atoms in hot elements of the
chromosphere and flares in the so-called helium and
sub-coronal flares. The origin of these elements is
evidently connected with transfer of chromospheric
material into the corona and vice versa. Because of this
they merit special scrutiny. (Author)

DESCRIPTORS: *Wood, *Chemistry, Hydrolysis,
Wood pulp, Paper industry, Production, Economics,
*Carbohydrates, Furfurals, Industrial research

The Japanese tend to utilize all resources, and their
waste utilization is superior to any other country.
The chemical utilization of the wood causes a waste
up to 50%. In the utilization of this waste, the
Japanese are at least two years ahead of the rest of
the world. (Extracted)
